Profile

Professional IT administrator served as executive manager, consultant, web admin, auditor and content manager. Began my career as helpdesk technician. Continued as a store manager, freelancer, consultant and eventually as an executive and technical manager. Established a startup as a co-funder and content manager. I am currently focused on my education in computer networks, cybersecurity and blockchains. My job in hand is practicing CCNA certification. In pursuit of expanding proficiency in stated subjects which I'm absolutely fond of; I have dedicating my time and effort to apply for a master's degree in affiliated fields as well.

- DIY

EXPERIENCE

Content Manager, Co-founder

From 2017 to 2018 | Coinit.ir

Coinit is a web media focused on blockchains and cryptocurrencies which I had the honor to be part of. My main role was to make amusing content and also supervise a team of three brilliant content creators. I was in charge of qualifying their work while collabrating with other team members, auditing and recommending what I believed to be satisfactory. I oftenly attended conferences and lectured about Blockchains as the face of this startup.

Technical Manager, Executive Manager

From 2017 to 2018 | Lioncomputer.com

Lioncomputer is one of the best known PC/hardware retailers in Iran. As a technical/executive manager I was in charge of cryptocurrency mining department and made sure we were proposing the best service in the field. Based on my experiences from the past such as technical support and my love of avid study of new technologies I made a team of three to devide the tasks to. Everything from Consultant, closing deals, providing new solutions, Implementation, Maintainance, Troubleshoot and Repair, being in top of competition and making exceptional profit margin, We honorably have done it. We managed to hold/participate in well known events and conferences related to Bitcoin and Blockchains such as BTCDay, IUST.ac.ir CS department , FinnExpo. Refernces available upon request.

Freelance IT Consultant

From 2015 to 2017 | Freelance

I was mostly focused on computer networks and Bitcoin's blockchain. Devided my time between providing technical support for Tak-Shayan PC store and freelancing IT solutions to companies which didn't have an in-house IT specialist. Also came up with mining soultions to hobbiest/small miners.

Store Manager

From 2010 to 2015 | Tak-Shayan PC store

Tak-Shayan is a local PC store in Yousef Abad. Most of my experiences in Helpdesk and technical support shaped here. We believed to be a good retailer but our main focus was costumer service and I learned nothing beats the loyal and trustful customer which comes from an excellent service.

IT Technician

From 2008 to 2009 | Takin Pouyesh Avizhe

TPA was a small company focused on business. My role was to make sure all IT infrustructure was providing excellent service and I supported my co-workers with their related issues.I also researched about new oppurtunities in the related field. I also did some public relation activity.

CERTIFICATES

CCNA (expected ~ 2022)

Currently practicing to my fullest extend for 200-301 exam and it would be done within next 6 months.

Ethereum and Smart Contract Programming Workshop @ AUT.ac.ir

Solidity is the main programming language of Ethereum Blockchain mainly used for smart contracts. Practiced essential programming exercises based on their important for coding in such environments over 40 hours.
