Robbie Sinclair

This is Mohammad Reza,

My background is all about computers. I've been in many different roles in IT industry and It's been a decade since I've started. From being a technician, IT support, store manager, freelancer all the way to the executive and manger. I didn't continue my education at the time because of many reasons, one of which is I didn't believe in higher education at the time and I already had a job. I never stopped being curious about technologies, particularly about computers and related innovations. Nevertheless, time went by and I grow older. I've pick up my education as a bachelor at PNU.

In PNU, I do have the right to divide my time between my passion and my studies at the same time. That's the main reason why I decided to go with PNU as my university.

During last five years, my passion for computer networks, cyber security, bitcoin and privacy made me way more serious about keeping on with my education and to be an expert in the field.

I would love to apply and enroll in a relative Master's degree and resume my career as an expert in computer networks or cyber security.

My main hobbies and interests other than computers are: music, travel, basketball and food.
